Challenges in Cellular Immunotherapy in Cancer Treatment

Message from the Guest Editor

Cell-based cancer therapies are continuously evolving and improving, not only in the treatment of hematologic malignancies but also in solid tumors. Prominent cellular cancer therapies comprise T cell-based and natural killer (NK) cell-based therapies engineered with synthetic chimeric antigen receptors (CARs). Based on your expertise in cellular immunotherapy, you are invited to contribute a research paper or review in this Special Issue to highlight the remaining challenges for clinicians: to achieve a maximal, selective and persisting anti-tumor immune response in patients suffering from rapidly progressive cancers. Studies focusing on B cell-based and DC-based immunotherapy, and pre-clinical investigations are also welcome.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
