Human Consciousness and Behavior towards Infectious Diseases and Vaccines 2.0

Message from the Guest Editor

The WHO has identified vaccine hesitancy as one of the 10 threats to global health. One of the biggest causes of vaccine hesitancy is an inaccurate understanding of infectious diseases and vaccines. Currently, a new strain of coronavirus has spread around the world. People have a great fear of new coronavirus infections. A vaccine protective for coronavirus would be received widely, even if there are inevitable severe or unknown adverse reactions. However, the vaccination rate of HPV vaccine is quite low in several countries, especially in Japan, for fear of alleged adverse reactions.

Consciousness on various kinds of infectious diseases, preventive behavior against infectious diseases including vaccination, and various kinds of bias on recognition of infectious diseases and vaccines might be a potential focus. Therefore, I would like to encourage the presentation of recent advances in the understanding of the mechanisms of vaccine hesitancy and how to overcome it, which will lead to the elimination of infectious diseases preventable by vaccine.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
