HPV Immunotherapy

Message from the Guest Editor

Infection with high-risk human papilloma viruses (HPV) is the causative agent of cervical cancer and is associated with other anogenital malignancies and head and neck cancers. Novel therapeutic approaches to control HPV cancers are of wide interest since, despite the implementation of an effective vaccination program, HPV cancer burden is still very high. Immunotherapy aimed at strengthening the host immune system response against tumor cells has shown promise in HPV malignancies. However, benefits are limited for some patients, urging more efforts in this area. The focus of this Research Topic is to collect articles, reviews or case reports covering different aspects of HPV cancers and immunology that shed light on potential innovative therapeutic options, such as, but not limited to:

- Immunotherapy and delivery systems;
- Tumor/immune system crosstalk;
- Strategies to re-educate immune cells;
- Biomarkers to follow and predict response to immune therapies.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
