Neurological Adverse Events Associated with Vaccination

Message from the Guest Editors

Neurological complications are among the most feared side effects, and the occurrence of multiple sclerosis or autism as a result of vaccinations are commonly cited by vaccination opponents. More recent developments such as RNA vaccinations are also causing fear among the lay public and are often used by opponents of vaccination to deter people from using vaccines. We invite colleagues from all disciplines to systematically exchange knowledge about neurological complications after vaccination. The latest developments in this area will be presented, and a comprehensive picture of the benefits and possible complications after vaccination will be given. Prof.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
