

## Special Issue

# Immunobiology and Vaccination Strategies in Emerging Infectious Diseases

### Message from the Guest Editors

Infectious diseases are disorders caused by organisms such as bacteria, viruses, fungi or parasites. Vaccination is an important approach that can prevent infectious diseases. Thanks to general vaccination programs worldwide, the prevalence of many infectious diseases has remarkably decreased. However, for some diseases, studies are ongoing to find effective vaccines combating especially emerging infectious diseases. The Scope of this Special Issue includes but is not limited to:

- Vaccination;
- Immunization;
- New adjuvants;
- Nano-adjuvants;
- DNA vaccine;
- Cocktail vaccine;
- In silico vaccine design;
- Vaccine hesitancy and safety;
- Public health rapid response vaccines to pandemics;
- New regulatory pathways for urgent vaccines;
- Vaccine platforms and delivery systems.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
