

Special Issue

Digital Innovation in Immunisation Programmes and Policies

Message from the Guest Editor

The aim of this Special issue is to collect and showcase high-level research outputs in the field of digital health applied to vaccine-preventable disease control from a broad perspective. We value studies focusing on all components of immunisation programmes, from health education and communication, to the organisation and monitoring of immunisation services that consider the planning, use, and impact of digital solutions, including, but not limited to: digital information systems, social media, smartphone applications, decision support tools, mobile and geospatial technologies, artificial intelligence and big data. Special attention will be paid to innovative insights and multidisciplinary approaches to public health in the digital era, applied to the field of vaccine-preventable disease control. We very much look forward to receiving your contributions.

Guest Editor

Dr. Anna Odone

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
