Cancer Immunotherapy and Immune Related Cardiac Complications

Message from the Guest Editor

Immunotherapy has revolutionized cancer treatment and have significantly improved the clinical outcomes of patients with advanced cancers. However, immune checkpoint inhibitors (ICIs) that target PD-1 (programmed cell death protein-1), PD-L1 (programmed cell death protein ligand-1) or/and CTLA-4 (cytotoxic T lymphocyte-associated antigen-4) are commonly associated with acute immune-mediated adverse events. Given potential fatal cardiac complications with ICIs, studies focusing on identification of prognostic markers that can help in risk stratification are encouraged.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
