Immunomodulatory Vaccines against Autoimmune Diseases

Message from the Guest Editor

Vaccination makes a huge contribution to preventing many infectious diseases and reducing the associated morbidity and mortality. It is a key pillar of an effective health care system. However, there is not much research on vaccination and autoimmune diseases. On the other hand, autoimmune diseases are often treated with immunotherapy. Whether vaccines are equally effective for each treatment requires further clarification. This Special Issue will focus on recent advances in autoimmune diseases and immunomodulatory vaccines. Based on your extensive knowledge and experience in the field, we cordially invite you to participate in this Special Issue.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Prof. Dr. Ger Rijkers

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
