

## Special Issue

# COVID Vaccines: Design and Development Strategies

### Message from the Guest Editor

Although several vaccines have been approved for market fight against the COVID-19, we still face the breakthrough established host immunity or even serological mutations from its variants. **Aim:** This special issue will provide a platform for discussing potential novel strategies for better vaccine designs, research works, and experimental results against the COVID-19.

#### Scope:

- Novel designs for COVID-19 vaccine, including broadening spectrum, sarbecovirus, multivalent, multi- or mosaic-antigens;
- Multiple vaccine technological platforms;
- Protective mechanisms;
- Correlation of protection and immune response.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
