Vaccination Hesitancy: Attitudes and Associated Factors

Message from the Guest Editors

Vaccines train our immune system to recognize the target virus and produce antibodies to fight the disease. Without vaccines, we risk severe illness and disability from diseases like measles, meningitis, pneumonia, tetanus, polio, and cancer. Despite the proven benefits of vaccination, many people are still hesitant to vaccinate. It's a key factor in investigating the aspects and characteristics of vaccine hesitancy to improve the vaccination rate. Therefore, this special issue aims to investigate the factors that cause people to hesitate to vaccinate to improve their confidence in vaccines. This special issue will collect research focusing on mathematical models and insights into applying survey analysis to vaccines. In this Special Issue, Theoretical contributions, comments, and data analyses are welcome. Research areas may include (but are not limited to) the following: vaccine hesitancy vaccine acceptance decision making vaccine confidence public health I/We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
