

## Special Issue

# Recent Developments in the Intelligent Transportation System (ITS)

### Message from the Guest Editors

Intelligent transportation systems (ITSs) use emerging technologies (information, sensing, computing, and communications) to advance transportation safety, to improve mobility and operating efficiencies and reliability, to enhance user productivity, and to maintain transportation sustainability and reduce the environmental impact of the growing travel demand.

For this Special Issue of *Vehicles*, entitled “Recent Developments in the Intelligent Transportation System (ITS)”, we encourage the submission of interdisciplinary research involving vehicles and the transportation infrastructure, as well as integrated applications between the two. Topics include, but are not limited to:

- Automated vehicle (AV) technology;
- Connected and automated vehicle (CAV);
- Cooperative driving automation (CDA);
- Vehicle to everything (V2X) technologies, including vehicle to pedestrian (V2P), vehicle to vehicle (V2V), and vehicle to infrastructure (V2I);
- Intelligent traffic control systems and next-generation traffic management systems;
- Intelligent commercial vehicle systems;
- Advanced transit systems;
- Privacy and security of ITS.

## About the Journal

### Message from the Editor-in-Chief

In response to economic, political, and environmental pressures, the automotive vehicle community is expanding its research, development, and production of more energysaving, environmentally friendly, and safer ground vehicles through vehicle electrification, powertrain hybridization, high-efficiency drivetrain, autonomous or automated driving, vehicle connectivity, and infrastructure.

*Vehicles* is a new open access and peer-reviewed international journal that will facilitate rapid publication of scholarly articles on studies related to ground vehicles. Its mission is to publish cutting edge articles, conference proceedings, and to organize Special Issues which highlight outstanding research on specific topics regarding all landbased vehicles with regards to the design, modeling and simulation, manufacture, testing, and operation and modification of those vehicles and their engineering systems.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Automotive Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.4 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the second half of 2025).
