

Special Issue

Reliability Analysis and Evaluation of Automotive Systems

Message from the Guest Editor

The automotive industry is rapidly evolving with the integration of advanced technologies, such as autonomous driving, electric propulsion, and connected vehicles. With these advancements, the reliability of automotive systems becomes crucial for ensuring safety, performance, and customer satisfaction. This Special Issue aims to explore the latest research and advancements in the reliability analysis and evaluation of automotive systems. The objective of this Special Issue is to connect researchers, engineers, and practitioners from academia and industry to share their knowledge, experiences, and innovative approaches in the field of automotive system reliability. We invite original research articles, review papers, and case studies that address various aspects of reliability analysis, evaluation, and improvement in automotive systems. We encourage researchers and experts in the field to contribute their valuable insights and findings to this Special Issue. By gathering and disseminating the latest research, this Special Issue will contribute to the advancement of reliability analysis and evaluation in automotive systems, ultimately enhancing the safety and

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Mohammed Chadli

Department UFR Sciences and Technologies, Université Paris-Saclay,
91020 Evry, France

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei
Compendex, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2
(Automotive Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 22.1 days after
submission; acceptance to publication is undertaken in 3.6
days (median values for papers published in this journal in
the first half of 2025).
