### Message from the Guest Editor

Dear colleagues, Autonomous vehicle technologies are advancing at a faster pace in recent years. There have been many exciting developments in new technologies that may contribute to improving the robustness of autonomous driving systems and thus making autonomous vehicles safer on the road. We are looking for original contributions in this Special Issue of *Vehicles* titled "Autonomous Vehicle Control". Topics include but are not limited to sensing/sensor fusion for object detection, autonomous navigation, autonomous vehicle modeling and simulation, the SLAM algorithm, and machine learning/deep learning-based robust detection algorithms.

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases.

### **Journal Rank:**

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Automotive Engineering)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.1 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
