Message from the Guest Editors

Dear Colleagues,

The Special Issue on "Advanced Therapy in Companion Animals" focuses on the latest innovations and techniques in veterinary medicine aimed at improving the health and well-being of pets. This edition explores cutting-edge therapies, including regenerative medicine, gene therapy, immunotherapy, and precision medicine, which are revolutionizing the treatment of chronic and acute conditions in companion animals. By highlighting breakthroughs in diagnostics, personalized treatment plans, and minimally invasive surgical procedures, the issue underscores the growing role of advanced technology in extending and enhancing the quality of life for pets. The special edition also emphasizes the importance of interdisciplinary collaboration between veterinarians, researchers, and biotechnologists to drive further progress in the field. With a combination of case studies, clinical trials, and expert reviews, this issue serves as a comprehensive resource for veterinary professionals seeking to stay at the forefront of advanced therapeutic approaches.

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Veterinary Sciences) / CiteScore - Q2 (General Veterinary)
