Message from the Guest Editors

Dear Colleagues,

Anesthetic and analgesic drugs authorized for livestock (e.g., sheep, goats, cows, horses) are very limited. Lidocaine is the main anesthetic used to perform most surgical procedures in livestock animals where the surgery is performed with the animal standing. However, some surgeries require the patient to lie down. Furthermore, due to pre-existing inflammatory pathologies, lidocaine may be unsuitable for performing surgery. Therefore, it is necessary to provide information on anesthetic and analgesic protocols applicable to large animals to ensure their well-being during surgical procedures.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, Kowloon, Hong Kong
2. Department of Pathobiology, Pharmacology and Wildlife Medicine, Faculty of Veterinary Medicine, Ghent University, 9820 Merelbeke, Belgium

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
