Message from the Guest Editor

Although cats have a lower rate of developing cancer than dogs, and fewer types of cancers affect cats than dogs, it is still estimated that approximately 1 in 5 cats will develop cancer as they age, and cancer is the leading cause of death in older cats. However, there is a disproportionately lower amount of research into feline versus canine oncology, and in contrast to dogs, cats are not as commonly thought of as model for human cancer. In order to address this imbalance, this Special Issue is dedicated to all investigations into understanding feline oncology.

Some suggested topics include investigations into the underlying aetiology, biology, or genetics of feline tumours, improvements in diagnostic tools, identification of biomarkers or prognostic indicators, evaluation of novel treatments, assessment of tumour frequency/incidence, or case reports of novel tumour types/clinical presentations (in both domestic and wild felids), [...]

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
