Message from the Guest Editor

Minimally invasive surgeries for veterinary patients are becoming more widely offered, both in referral and non-referral settings. New minimally invasive techniques and procedures are described in the peer-reviewed literature on a regular basis. Implementing the most up-to-date information while performing MIS surgery is crucial for veterinarians who want to continuously obtain the best possible outcome for their patients. Our objective is to encourage scientists to publish their experimental and theoretical findings in as much detail as possible. As a result, the goal of this Special Issue is to publish high-quality articles relating to MIS veterinary surgery in general, soft, and orthopedic tissues.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: Case selection and/or prognosis assessment, peri- and intraoperative therapies and procedures to enhance outcomes, surgical techniques, surgical instruments, post-therapy care, and complication management are examples of topics that might be covered.

I/We look forward to receiving your contributions.

Special Issue

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.
Journal Rank: JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q2 (*General Veterinary*)
