Special Issue

The Relationship of Animal Health Management and Livestock Production to Food Safety

Message from the Guest Editors

Sustainable production through animal health management systems is acknowledged today as the way forward for livestock production systems vis a vis food safety. A number of critical issues are linked to the above-mentioned perception, such as antimicrobial resistance, use of antimicrobials, biosecurity, welfare, etc. The impact of animal health management and sustainable livestock production on food safety needs to be accurately addressed but also holistically viewed in the context of One Health. The human-animalenvironment interface needs to be further elucidated in a multidisciplinary manner with regard to climate change as well. Animal health management is directly linked to the safety and security of food of animal origin. and therefore, its assessment is crucial for the consumer and public health protection. The aim of this Special Issue is to highlight all these issues with the latest scientific knowledge with a view to enhancing food safety for the benefit of the consumer. Thus, researchers are invited to contribute high-quality original research or review papers.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

- Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium
- Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
