Small Animal Gastrointestinal Diseases: Challenges and Advances

Message from the Guest Editor

Over the past 10 years, research in gastroenterology and hepatology has made much progress. It also has highlighted research aspects that changed how we approach both the diagnostic and therapeutical processes of liver and intestinal diseases, especially those associated with microbiota and metabolomics. In addition, some studies have shown important pathogenetic associations between the organs of the digestive system and other organs, such as the kidneys, pancreas, and endocrine glands. This Special Issue aims to provide an update on the new knowledge for the clinical management of the digestive diseases of dogs and cats. Original research articles, reviews, and communications are welcome. Research areas may include acute and chronic enteropathies, acute and chronic pancreatitis, hepatitis, and biliary tract disease in all aspects of diagnostics and therapeutics. Studies on innovative diagnostic techniques and biomarkers will be particularly appreciated. Hopefully, this Special Issue will further stimulate collaboration between scientists engaged in all aspects of this field of research.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
