Special Issue

Diagnosis, Prognosis, and Treatment of Inflammatory Diseases in Horses

Message from the Guest Editors

Inflammation is a natural host response to tissue insult and injury. In addition to the benefits it provides, inflammation also plays a serious role in the pathophysiology of numerous diseases and conditions that affect horses, having deleterious effects on patient health and welfare. Researchers are continuously seeking new ways to understand, predict, prevent, mitigate and treat these inflammatory disorders in horses. This Special Issue seeks to provide new insights into and findings from the diagnosis, prognosis and treatment of inflammatory conditions and diseases that impact the health and welfare of equids around the world. Potential topics include, but are not limited to:

- Inflammatory cell signaling;
- Cellular mechanisms of inflammation;
- Novel biomarkers of inflammation:
- Impact of inflammation on disease outcomes;
- Clinical studies of inflammatory disorders;
- Novel treatment strategies.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

- Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium
- Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
