

Special Issue

Tick-Borne Diseases and Their Control

Message from the Guest Editor

The study concerned the exploration of diagnostic therapeutic and prognostic markers of infection-induced pathology spirochetes *Borrelia burgdorferi* s.s., *B. afzelii* and *B. garinii* at different stages of the disease. The degree of differentiation in these individuals and the gene expression profiling of mRNA post-transcriptional modifications associated with the function of MHC known as HLA (human leukocyte antigens), genes associated with inflammation and genes encoding extracellular matrix proteins were analyzed. Transcriptomes were determined with the oligonucleotide microarray technique (Affymetrix) using HGU 133A plates, allowing for the simultaneous analysis of 22283 mRNAs. The results of immunological and clinical studies of people infected with ticks and patients with borreliosis were analyzed. This study should be combined with the act of increasing the knowledge surrounding the role of ticks in the transmission of diseases.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium

2. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
