

## Special Issue

# Advanced Therapy in Companion Animals—2nd Edition

### Message from the Guest Editors

Following the great success of the first edition of this Special Issue, “[Advanced Therapy in Companion Animals](#)”, we are pleased to launch the second edition, in which we will continue to explore cutting-edge advancements in veterinary medicine, focusing on innovative therapies that enhance the health and well-being of companion animals. Topics of interest include regenerative medicine, gene therapy, immunotherapy, and precision medicine, all of which are transforming the management of both chronic and acute conditions. Building on the momentum of the first edition, this Special Issue will highlight breakthroughs in diagnostics, personalized treatment plans, and minimally invasive procedures, emphasizing the role of advanced technology in extending and improving pets’ quality of life. It will also underscore the importance of interdisciplinary collaboration among veterinarians, researchers, and biotechnologists in driving further progress in this field. Featuring case studies, clinical trials, and expert reviews, this Special Issue will serve as a valuable resource for veterinary professionals looking to stay at the forefront of advanced therapeutic approaches.

## About the Journal

### Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).
