Prevention and Control of Infectious Diseases in Small Ruminants

Message from the Guest Editors

The small ruminant industry plays an important role in many countries in Africa, Asia, Australia, and parts of Europe. However, the health and productivity of these animals are increasingly threatened by infectious diseases such as *Pasteurella* infections, clostridial diseases, CCPP, FMD, sheep and goat pox, contagious ecthyma, PPR, and bluetongue, while zoonotic pathogens including *Brucella* spp., *Salmonella* spp., Rift Valley fever virus, and *Echinococcus* spp. pose additional risks to animal and human health.

This Special Issue will enhance our understanding of clinical important pathogens, facilitate the development of innovative prevention and control strategies, and ultimately reduce economic losses. We will focus on the most recent progress in pathogenesis, interactions with host proteins, epidemiology, diagnosis, and novel vaccines in relation to important pathogens, from a One Health perspective. Pathogen types of interest include, but are not limited to, bacteria and viruses. We invite you to submit your most recent research findings and/or insights (original research articles and reviews) for consideration for this Special Issue.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium

2. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
