Insights in Animal and Human Leptospirosis

Message from the Guest Editor

Leptospirosis is a zoonosis causing severe diseases both in humans and animals. Climatic changes observed in the last years favoured the spreading of pathogenic leptospirae; number of cases of leptospirosis often increase after hurricanes or floods when people may have to wade through contaminated water or use it for drinking or bathing. Leptospirosis causes economic losses in livestock due to reproductive disorders; lethal forms are still observed in dogs; wild animals act as the main accidental hosts. In view of these observation, we can affirm that leptospirosis is still a current treat not only in the developing countries where the prophylaxis measures are not regularly followed, but also in farm, domestic and urban environments. The aim of this Special Issue is to give a platform for practitioners and researchers operating in human and veterinary medicine to exchange information and updates. With this goal, we cordially invite you to submit research articles, review articles, case reports and short communications related to the various aspects of *Leptospira* infections in humans and animals.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, Kowloon, Hong Kong
2. Department of Pathobiology, Pharmacology and Wildlife Medicine, Faculty of Veterinary Medicine, Ghent University, 9820 Merelbeke, Belgium

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
