Advances in the Artificial Insemination of Small Ruminants: Application in European Countries

Message from the Guest Editors

In comparison with the spread of the practice in the cattle breeding industry, the use of artificial insemination in small ruminants is very limited today. This is especially true for artificial insemination with the use of frozen insemination doses in most European countries. This Special Issue plans to provide an overview of the most recent advances in the field of artificial insemination of small ruminants applications in European countries. Contributions from territories outside of Europe which can enhance the current state of artificial insemination in European countries are also welcomed.

- Optimizing artificial insemination methods appropriate for small ruminants;
- Artificial insemination with fresh, chilled, or cryopreserved sperm;
- Reproductive physiology, and endocrinology of the estrus in sheep and in goats;
- Development of sperm diluents;
- In vitro assays to predict the fertilizing ability of rams and bucks;
- Ethical questions related to artificial insemination of small ruminants.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
