

Special Issue

Neuropeptides: Role and Function in Species of Veterinary Interest II

Message from the Guest Editors

After the success of the previous Special Issue, *Neuropeptides: Role and Function in Species of Veterinary*, we are pleased to invite researchers to contribute to its second edition. Likewise, the focus of this Special Issue is the role and function of neuropeptides in species of veterinary interest. Neuropeptides, being highly conserved during evolution, lend themselves to comparative and evolutionary studies. Due to their primary amino acid structure, neuropeptides are classified into several families. Thus, they can play different functional roles in organs and/or tissues of the same animal species, but, above all, between different species and classes. Furthermore, the explosion of research activity in this field has led to the identification of numerous endogenous naturally occurring peptides that act as neurotransmitters and neuromodulators or trophic factors that act as mediators of nervous system functions.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium
 2. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
