

Special Issue

Zoonotic and Emerging Diseases at Human-Animal Interface

Message from the Guest Editor

In the last three decades, at least 30 new pathogens found in humans were zoonotic: New diseases are coming from animals and they do not respect regional boundaries. A significant progress is being made in understanding the evolution, epidemiology, host-pathogen interactions, devising next-generation control strategies, assessing socio-economic impacts and mapping global research opportunities. To prepare for future outbreaks and build on existing knowledge of zoonotic and emerging diseases, this Special Issue calls for leading researchers to contribute their recent findings, especially focusing on, but not limited to:

- Epidemiology and Evolution
- Host-pathogen interaction
- Vaccines and immunity
- Next generation control strategies
- Socio-economic impacts

Guest Editor

Dr. Muhammad Munir

Lecturer in Virology, Division of Biomedical and Life Sciences, Faculty of Health and Medicine, Lancaster University, Lancaster LA1 4YG, UK

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium

2. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
