Advances in Bovine Uterine Infection

Message from the Guest Editor

After parturition, the bovine uterine lumen becomes contaminated, and pathogenic microorganism persistence often leads to uterine infection. The consequences of the disease can include subfertility and even infertility, and eventually huge financial losses. Risk factors involve the species and load of bacteria, metabolic disorders, unhygienic conditions, endocrine disturbances, and concomitant reproductive abnormalities. However, most of these factors are not particularly amenable to intervening to reduce the disease. Research advances in bovine uterine infection can shed light on new strategies for the prevention and treatment of the disease. This Special Issue on “Advances in Bovine Uterine Infection” invites reviews and original articles to update knowledge and present the most recent scientific data regarding bovine uterine infection. It is hoped that this issue will stimulate collaboration between scientists engaged in all aspects of this field of research.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, Kowloon, Hong Kong
2. Department of Pathobiology, Pharmacology and Wildlife Medicine, Faculty of Veterinary Medicine, Ghent University, 9820 Merelbeke, Belgium

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
