

Special Issue

Spotlight on Interventional Radiology in Small Animals

Message from the Guest Editor

One of the most exciting and fulfilling elements of veterinary medicine is the continued discovery of new treatments for seemingly untreatable diseases and novel applications of equipment or diagnostic techniques. One such advancement in recent years includes the introduction of interventional radiology for veterinary patients. Interventional radiology encompasses a wide variety of diagnostic and treatment techniques utilizing fluoroscopic and endoscopic imaging modalities in a minimally invasive method. Many of these procedures are shared between human and veterinary clinicians, allowing our patients to benefit from advances in human treatments.

This issue will focus on new advancements in interventional techniques in veterinary medicine, supplementing previously published reports on neoplastic, urogenital and hepatic diagnostics and treatments. We hope that this issue will inspire and educate veterinarians as to the possibilities of this technology, and what can be done for our patients regardless of size and diagnosis.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium

2. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
