

## Special Issue

# Emerging Infectious Disease: Viral Enteric Pathogens with Zoonosis Potential in Domestic and Wild Animals

### Message from the Guest Editor

It is estimated that, globally, about one billion cases of illness and millions of deaths occur every year from zoonoses. About 60% of emerging infectious diseases that are reported globally are zoonoses. Over 30 new human pathogens have been detected in the last three decades, 75% of which have originated in animals. In the last few years, much progress has been achieved in the diagnosis of infectious diseases in wildlife, but additional information and studies are necessary to improve the identification and characterization of old and new pathogens in wild species, including zoonotic agents. The aim of this Special Issue is to publish original research work or reviews on these topics in order to give an effective improvement of the current knowledge with a One Health approach of infectious diseases.

## About the Journal

### Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

### Author Benefits

#### High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
