

Special Issue

Parasitology Research: Surveillance Pathogens and Its Mechanism

Message from the Guest Editor

In recent years, new technologies and concepts in molecular biology, immunology, and genetics have been applied to the study of veterinary parasitology. This leads to a novel and interesting approach to the vaccine and diagnostic tool development, rational drug design, detection and more accurate classification of some parasites, and a more detailed understanding of host-parasite relationships. This Special Issue provides a platform to exchange research results, expertise, and opinions including but are not limited to:

- veterinary public health
- wildlife diseases
- emerging and exotic infectious diseases
- surveillance strategies
- fisheries culture
- molecular epidemic diseases
- dietary and biological treatment of infestations
- animal wellbeing
- organic farming systems
- new vaccination strategies
- drug target characterization and rational drug design

Guest Editor

Dr. Rong Jyh Lin

Department of Parasitology, School of Medicine, College of Medicine, Kaohsiung Medical University, Kaohsiung 807378, Taiwan

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium

2. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
