Blood Pressure Monitoring for Small Animals

Message from the Guest Editor

Despite becoming more widely used in small animal medicine, blood pressure measurement is still an area where there are gaps in our knowledge and significant challenges for practicing veterinarians. Part of the reason for our incomplete understanding is the challenge that blood pressure monitors have to overcome in order to accurately measure blood pressure, especially in awake animals. Both hypotension and hypertension can detrimentally affect our small animal patients so that monitoring is essential in many clinical settings. This Special Issue will act as a source of the newest information on blood pressure related topics in small animal practice. Original research articles, case series and reviews are welcomed that focus on a blood-pressure-related topic such as measurement and monitoring (equipment, techniques, etc.), hypertension or hypotension.

Guest Editor

Prof. Dr. Anthony P. Carr

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium

2. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
