

## Special Issue

# Health and Welfare of Farm Animals and Their Impact on the Quality and Safety of the Derived Products

### Message from the Guest Editors

Farming systems are continuously evolving to satisfy the growing consumer demands for high-quality and safe products derived from animals reared under enhanced health and welfare standards. Moreover, it is increasingly evident that the viability of the modern livestock sector is intrinsically linked to the principles of sustainable production, the circular economy, and the conservation of natural resources. Within this framework, animal health and welfare, food safety, and public health have emerged as paramount concerns for consumers and producers. In recent years, the concept of quality has evolved to encompass more than just sensory attributes. Indeed, a broad range of criteria is now utilized to assess product quality, including the quality of life and the overall well-being of farm animals as determined by the occurrence of infectious and non-infectious diseases and welfare issues. The aim of this Special Issue is to present original research and reviews on the effects of farm animal health and welfare challenges on the intrinsic and extrinsic quality and the safety of the derived products.

## About the Journal

### Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

### Author Benefits

#### High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
