Control Strategies of Ticks and Tick-Borne Pathogens

Message from the Guest Editors

Ticks are considered an important vector of pathogens, including distinct etiological agents (viruses, bacteria/rickettsioses and protozoans). Tick infestations and tick-borne diseases result in high economic impacts on animal health, promoting increased production costs in the world's cattle and poultry industries, for example. Similarly, tick infestations in pet animals are a health threat considering the impact during the blood feeding and tickborne diseases, in addition to their role as sentinels for tick-borne infections in humans.

We invite investigators to contribute original research articles as well as review articles that will stimulate continuing efforts to advance in the field of control strategies of ticks and tick-borne pathogens. Topics may include, but are not limited to, the following: biology of tick infestations in animal models for testing acaricides and vaccines; acaricidal analysis against ticks related to pets and animal production related to food chains; testing of new antigens and repellents for controlling ticks and tick-borne diseases; evaluation of the economic impact of ticks and tick-borne diseases in pets and production animals.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium

2. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
