Special Issue

Advances in Veterinary Clinical Microbiology

Message from the Guest Editor

Driven by the development of novel techniques and the deepening of knowledge pertaining to microbiology, veterinary clinical microbiology has witnessed substantial advances in the last decade. However, infectious zoonosis diseases caused by clinically relevant veterinary microbes have a profound impact on public health. To face these challenges, new methods or drugs that facilitate the efficient treatment and prevention of veterinary clinical microbiology are required continually.This Special Issue of Veterinary Sciences is focused on the current knowledge and recent advances in veterinary clinical microbiology. We intend a) to offer a resource of current and advanced topics and developments in the field of veterinary bacteriology, veterinary virology, veterinary parasitology, veterinary clinical infectious diseases, zoonotic microorganisms, clinical animal pathogenic microorganism transmission etc.; and b) to provide current and novel approaches for the diagnosis of infectious agents.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye
1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium
2. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:
JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
