

## Special Issue

# Allergies in Animals and Humans

### Message from the Guest Editor

Allergy to inhalant and food allergens affects many patients worldwide. Various animal species are also known to suffer from allergic diseases, such as dogs with atopic dermatitis due to sensitization to house dust mites. Research into elucidating allergy mechanisms and development of new therapies in humans has been possible by utilizing animal models. This Special Issue of *Veterinary Sciences* on "Allergies in Animals and Humans" invites original articles and brief communications, as well as reviews, especially on how allergic diseases in animals can shed light on these in humans, or visa versa. Hopefully, this will lead to closer collaboration between researchers in the veterinary and medical sciences to tackle this important disorder.

## About the Journal

### Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

### Author Benefits

#### High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
