

Special Issue

Impact of Housing Environment on Health and Welfare of Farm Animals

Message from the Guest Editors

Farm animals are subject to variable housing conditions and management practices, which can affect their immunocompetence, pathogen exposure, metabolic health, and well-being. The refinement and adaptation of husbandry systems thus might contribute to reduced disease susceptibility, reduced need for medicines such as antibiotics, and improved health, welfare, and also performance within livestock species. The Special Issue “Impact of Housing Environment on Health and Welfare of Farm animals” intends to collect scientific research covering a broad range of topics to highlight the various management factors influencing the health status of farm animals, and to characterize potential targets for the improvement of housing conditions. Investigations may cover housing conditions such as group size, group stability, provision of enrichment material, temperature, light conditions, space provision, and outdoor access. Studies on management interventions such as vaccination strategies, feeding regimes, or farrowing management, or those discussing behavioral parameters are also welcome.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium

2. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
