Trends in Nonhuman Primate Medicine & Care

Message from the Guest Editors

Nonhuman primate medicine and care is progressively becoming a dominant field in animal science, as welfare has attracted the growing attention of the international community at large, including zoo visitors, animal managers and all manner of others involved in the care of nonhuman primates. Updates and novelties about new pharmaceuticals, surgical and imaging techniques, treatment strategies of disorders and diseases, and nutrition, as well as knowledge of specific animal behavioral needs, are often initially described in human medicine and eventually become documented in nonhuman primate species. In some cases, these various modalities result in similarities and specificities in monkeys, and in other cases, result in totally different and sometimes unexpected outcomes. It is imperative that all of the results of these new trends, both positive and negative, are published, as laboratory animal professionals, wildlife experts and the general scientific community stand to learn from them. This Special Issue will provide the latest updates in veterinary care in nonhuman primates, improving their welfare and enhancing their management.

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

1. Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium
 2. Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
