# Special Issue

# Canine Rabies Surveillance, Control and Elimination

## Message from the Guest Editor

Despite being the oldest zoonotic disease known to humanity, rabies still kills tens of thousands of people each year. Moreover, dog-mediated rabies represents 99% of human cases. Improving surveillance systems and control and elimination programs for canine rabies. therefore, is a global public health imperative and should be at the forefront of veterinary science priorities. This Special Issue is dedicated to discussing recent developments in canine rabies surveillance, and exploring new control and elimination strategies for canine rabies. The pressing challenges to eliminate canine rabies require transdisciplinary teams and projects; manuscripts using the One Health approach are specially encouraged for this special issue. The Special Issue will highlight new research questions, current challenges, innovative approaches and techniques, and will bring attention to one of the most neglected diseases in the world. We look forward to your valuable contributions on this interesting and important topic.

## **About the Journal**

## Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

## **Editor-in-Chief**

## Prof. Dr. Patrick Butaye

- Department of Pathobiology, Pharmacology and Zoological Medicine, Faculty of Veterinary Medicine, Ghent University, Salisburylaan 133, B9820 Merelbeke, Belgium
- Department of Infectious Diseases and Public Health, Jockey Club College of Veterinary Medicine and Life Sciences, City University of Hong Kong, 31 To Yuen Street, Kowloon, Hong Kong SAR 999077, China

## **Author Benefits**

## High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

## Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
