Control, Prevention and Elimination of Zoonotic Diseases

Message from the Guest Editor

The concept of One Health recognizes that the health of people is connected to the health of animals and the environment. Zoonoses are diseases that are transferable between humans and animals, and, therefore, all fall within the scope of One Health. More than 200 zoonotic pathogens have been described. Work on the control, prevention and, ultimately, elimination of zoonoses is therefore an essential contribution to One Health. We are inviting contributions on this topic, especially submissions on the control, prevention and elimination of zoonoses classified as “neglected” by the World Health Organization (WHO) and in contribution to their Roadmap towards the elimination of these diseases (http://www.who.int/neglected_diseases/diseases/en/).

About the Journal

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Editor-in-Chief

Prof. Dr. Patrick Butaye

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
