

Special Issue

Engineering on Vibratory Risks

Message from the Guest Editor

The 5th International Congress Engineering of Industrial Risks (CIRI 2018) will be held from 14 to 16 April, 2018, in Alger, Algeria. The 2018 edition is organized by the Algerian Association for Technology Transfer (a2t2). It aims at gathering researchers and technicians in the fields of non-destructive inspection, vibratory and acoustic monitoring, as well as physical risks in applied biomechanics. It is the fifth of a series of multi-year bilingual (English/French) congresses held in various countries with the objective of building an international community in the fields related to physical and industrial risks. CIRI 2018 will be structured around three sessions in the following areas:

- Non-destructive inspection
- Vibration monitoring
- Physical risks

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Aleksandar Pavic

College of Engineering, Mathematics and Physical Sciences, University
of Exeter, Kay Building, Exeter EX4 4QF, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), and other
databases.

Journal Rank:

CiteScore - Q2 (Engineering (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 22.7 days after
submission; acceptance to publication is undertaken in 2.9
days (median values for papers published in this journal in
the first half of 2025).
