Department of Hygiene, Epidemiology and Medical Statistics, Medical School, National and Kapodistrian University of Athens, 11527 Athens, Greece

Deadline for manuscript submissions: closed (30 April 2023)

Message from the Guest Editors

Dear Colleagues,

During the last decade, it has been scientifically clear that climate change has led to the emergence or re-emergence of zoonotic viral diseases making them one of the most important public health concerns all over the world. It is predicted that these viruses, such as West Nile Virus, Dengue fever. Hantaviruses. vellow fever virus. Sindbis virus, Crimean-Congo Chikungunya virus. hemorrhagic fever virus will most likely increasingly affect the worldwide population in the future.

Therefore, we kindly ask you to share your research work and available data on such viruses. Under the prism of One Health, human and animal data including entomological studies are welcomed.

Director, HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews. regular research papers. communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Infectious Diseases)
