Message from the Guest Editors

Dear Colleagues,

During the last decade, it has been scientifically clear that climate change has led to the emergence or re-emergence of zoonotic viral diseases making them one of the most important public health concerns all over the world. It is predicted that these viruses, such as West Nile Virus, Dengue fever, Hantaviruses, yellow fever virus, Chikungunya virus, Sindbis virus, Crimean–Congo hemorrhagic fever virus will most likely increasingly affect the worldwide population in the future.

Therefore, we kindly ask you to share your research work and available data on such viruses. Under the prism of One Health, human and animal data including entomological studies are welcomed.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
