Message from the Guest Editor

Dear Colleagues,

Following the success of the “Endemic and Emerging Swine Viruses” series (see the **2020**, **2021**, **2022** and **2023** editions), we are editing a 2024 edition of this very popular topic for new submissions.

The main topic of this Special Issue is agriculturally important swine viruses that have an effect on swine production or overall swine health. This includes viruses that have recently caused outbreaks, for example, African swine fever virus (ASFV) in Europe and Asia and classical swine fever virus (CSFV) in Japan, which are causing devastating losses to the swine industry. Endemic swine viruses include porcine reproductive and respiratory syndrome virus (PRRSV), porcine epidemic diarrhea virus (PEDV), porcine deltacoronavirus (PDCoV), swine influenza virus (SwIV), foot-and-mouth disease virus (FMDV), Senecavirus A (SVA), swine influenza, porcine circovirus (PCV), porcine sapelovirus (PSV), porcine astrovirus (PAstV), and any other endemic or emerging porcine viruses.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
