Deadline for manuscript  
submissions:

**closed (20 November 2022)**

### Message from the Guest Editors

For this Special Issue, we invite contributions on ASF research in Africa that will allow for a better understanding of the multiple genotypes of the virus to improve diagnostics and control on the continent; the immune response and genetic make-up of African domestic pigs and wild host reservoirs and vectors of the virus; and pig production systems, value chains, and socio-economic issues and their role in the maintenance and spread of ASF. While research on pigs focuses strongly on ASF due to the global interest in the disease, other viral diseases are neglected. Some of these are (or may already be) present, while others are likely to emerge with increasing intensification of pig production. This special edition invites contributions on any existing research on other porcine viral diseases in Africa.

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

**Journal Rank:** JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
