Deadline for manuscript  
submissions:

**closed (31 December 2021)**

### Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to present focused reviews on recent advances in understanding:

- The basic immunobiology responsible for primary and memory B cell and antibody responses to acute viral infections;
  - Contributions of various immune cell types in classical germinal center response and extrafollicular response;
- The diversity and immunodominance of antiviral antibody responses;
- How antibodies exert antiviral activity in vivo;
  - Direct effects and contributions of Fc expressing innate immune cells;
- How antibody selection contributes to viral evolution;
- Viral interference with B cell immunity;
- Computational modeling of Ab responses.

Dr. Jonathan Wilson Yewdell

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

**Journal Rank:** JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
