Italy

Deadline for manuscript
submissions:

16 August 2024

Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Viruses* will explore key challenges in the global elimination of viral hepatitis. It will particularly focus on three broad areas of research that are all needed to reduce the global burden of viral hepatitis. First, it will report innovations in diagnostics to improve and simplify the process of obtaining a reliable, low-cost, and quick diagnosis. Second, it will explore novel pathways that link people to care and treatment, making treatment services acceptable and reducing stigma. Third, it will examine surveillance systems and interventions in healthcare data to monitor progress toward elimination. This Special Issue aims to publish cross-disciplinary submissions including epidemiology, clinical, health services, and social research focused on viral hepatitis.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
