Message from the Guest Editors

Recent large outbreaks of Ebola and Marburg virus disease, Lassa fever, Crimean Congo hemorrhagic fever and severe fever with thrombocytopenia syndrome have afforded higher-resolution views at human clinical diseases historically referred to as “viral hemorrhagic Fevers.” In addition to updating our understanding of the spectrum and severity of acute disease syndromes, recent encounters have renewed interest in, e.g., the role of pathogen–agnostic care in addition to virus-specific countermeasures, clinical sequelae after infection, and viral persistence potentially associated with inflammatory syndromes or risk of transmission and outbreak re-ignition. Although there are no FDA-approved medical countermeasures against these viral agents, increased funding, interest, and novel technologies have accelerated research and understanding of many medical aspects of these and other, more neglected viral hemorrhagic fever-causing pathogens. The present Special Issue covers a wide range of topics focusing on human clinical disease related to such “Medical Advances in Viral Hemorrhagic Fever Research”.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
