Message from the Guest Editor

Dear Colleagues,

Natural products (NPs) extracted from medicinal plants and marine life have been suggested as excellent sources for the development of novel pharmaceuticals. In past years, many NPs have been identified to target the viral life cycle, including viral entry, replication, assembly, and release. In addition, host factors associated with viral infection have also been identified as novel targets of NPs. Particularly, NPs with antiviral and immune-modulation activities are potential agents against emerging COVID-19 infectious diseases.

For this Special Issue, we welcome contributions directed at the discovery of antiviral natural products, as well as at mechanistic studies of extracts and NPs against viruses.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
