### Message from the Guest Editors

Dear colleagues,

Due to climate change, urbanization, changes in land use, and changes in human and animal demography, arboviruses have been emerging and re-emerging during the last few decades, as can be seen from the ongoing Usutu Virus and West Nile Virus outbreak in Europe and the Zika virus outbreak in Brazil. Other arboviruses are also currently circulating in different parts of the world, such as Chikungunya Virus, Rift Valley Fever Virus, African Swine Fever Virus, Japanese Encephalitis Virus, and Yellow Fever Virus. In this Special Issue, we would like to address the molecular biology, evolution, and control of emerging arboviruses. These emerging arboviruses include viruses of human importance as well as viruses of veterinary importance.

Dr. B. B. Oude Munnink

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

**Journal Rank:** JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
